

# STRATHDALE RESERVOIR ROAD

## General Notes for Standpipe Usage

1. Drivers need to ensure they are aware of their vehicle/trailer's legal rated carrying capacity.
2. Vehicles must not leave the site overloaded.
3. When loading tanks ensure that you do not put yourself at risk by climbing in unsafe areas.

## Site Specific Notes

1. Parking at this site can be done prior to the standpipe, however, on weekends the demand for designated parking spots will be greater. If the area is full then vehicles must come back at a quieter time.
2. Whilst parked in the designated parking area, care shall be taken to avoid interfering with the main traffic flow down Reservoir Road.
3. When leaving the site all vehicles will move slowly – drivers need to take extra care in avoiding a collision with approaching traffic.
4. When leaving this site drivers are not to perform a U-Turn from the standpipe. There is a crest in the road and oncoming traffic will not have enough time to avoid a collision.
5. Vehicles using this site should plan their route to utilise the Mclvor Highway when leaving with a full load.
