Goulburn System

Goulburn supply system consists of: Rochester, Lockington, Dingee, Mitiamo, Pyramid Hill, Macorna, Mysi and Boort.

All of our supply systems have different sources of water and supply constraints. Please ensure you read the update relevant to your town.

We welcome your feedback on these updates to ensure we are providing information that is relevant and useful.

Send your suggestions and feedback to our postal address:

37- 45 Bridge Street,
Bendigo 3550 or e-mail to:

What we need for customer supply

Residential customers	Business and industry	Operational water**	Total (Megalitres)
550ML	800ML	450ML	1800ML

Water needs for 12 months based on Stage 3 water restrictions.

For all current water restriction levels refer to - www.coliban.com.au

** Operational water includes all losses eg. evaporation, system losses, seepage and treatment process losses.

What we currently have

Goulburn bulk water entitlement	Carry over water from last season	Temporary water purchased	Urban trade water	Total (Megalitres)
1,573ML	223ML	0ML	0ML	1,796ML

Additional water information

Bulk entitlement

Goulburn annual bulk entitlement volume	Current allocation
2,420ML	65%

Goulburn-Murray Water announced a 100% bulk entitlement allocation in the Goulburn system on 1 November 2008 . No BE allocation has been declared in 2009/10 but it is projected to be 65% following discussion with GMW.

Water restrictions outlook

Water Restriction outlook		
	October	December
Wet	Stage 1	PWSR*
Average	Stage 3	Stage 2
Dry	Stage 3	Stage 3

These outlooks are based on allocation predictions from Goulburn-Murray Water.

Wet Inflow conditions that have 1 in 10 chance of being exceeded
 Average Inflow conditions that have 5 in 10 chance of being exceeded
 Dry Inflow conditions that have 9 in 10 chance of being exceeded
 *PWSR Permanent Water Saving Rules

Consumption - actual versus forecast

The graph below indicates the actual demand in the Goulburn system compared with the predicted demand for Stages 2 water restriction.

Total consumption for 2009/10 is 123ML which is 28ML higher than the forecast demand because of the leak/burst in the water main at Rochester.
