

securing | our water future

Wimmera System

Wimmera supply system consists of: Borung, Korong Vale, Wedderburn and Wychitella.

All of our supply systems have different sources of water and supply constraints. Please ensure you read the update relevant to your town.

We welcome your feedback on these updates to ensure we are providing information that is relevant and useful.

Send your suggestions and feedback to our postal address:

37- 45 Bridge Street,

What we need for customer supply

Residential customers	Business and Industry	Operational water**	Total (Megalitres)
70ML	30ML	150ML	250ML

Water needs for 12 months based on Stage 4 water restrictions.

For all current water restriction levels refer to - www.coliban.com.au

** Operational water includes all losses eg. evaporation, system losses, seepage and treatment process losses.

What we currently have access to

Wimmera bulk water entitlement*	Total (Megalitres)
350ML	350ML

* Under current Bulk Entitlement terms and conditions.

Water currently in storage basins

Volume in our storages	20ML (approx)
------------------------	---------------

As part of our Wimmera raw water storage works, Borung and Wychitella have recently been connected to covered water supply tanks. Korong Vale and Wedderburn are now supplied from two new lined basins (4.4ML in capacity).

There is also approximately 15ML of water remaining in the old Korong Vale earthen storage, which will be abandoned upon completion of the connection to the new Wimmera Mallee pipeline.

Additional water information

Bulk entitlement

Wimmera bulk entitlement	Current allocation
450ML	350ML

Water restrictions outlook

The completion of the Wimmera Mallee Pipeline to fully supply the new raw water storage basins and tanks is required before Stage 4 water restrictions in the Wimmera system can be eased. These works are scheduled for completion this financial year.

	Water Restriction outlook	
	June	August
Wet	Stage 4	PWSR*
Average	Stage 4	Stage 2
Dry	Stage 4	Stage 4

Wet Inflow conditions that have 1 in 10 chance of being exceeded
 Average Inflow conditions that have 5 in 10 chance of being exceeded
 Dry Inflow conditions that have 9 in 10 chance of being exceeded
 *PWSR Permanent Water Saving Rules

Consumption - actual versus forecast

The graph below indicates the actual demand in the Wimmera System compared with the forecast demand for Stage 4.

Wimmera monthly actual demand for March was 5ML less than the forecast demand. Total consumption for 2009/10 is 185ML which is 15ML less than the forecast demand.
