

Campaspe supply system consists of: Axedale and Goornong.

All of our supply systems have different sources of water and supply constraints. Please ensure you read the update relevant to your town.

We welcome your feedback on these updates to ensure we are providing information that is relevant and useful. Send your suggestions and feedback to our postal address: 37-45 Bridge Street, Bendigo 3550 or e-mail to: publicaffairs@coliban.com.au

What we need for customer supply

Residential customers	Business and industry	Operational water**	Total (Megalitres)
50ML	10ML	50ML	110ML

Water needs for 12 months based on Stage 4 water restrictions.

For all current water restriction levels refer to - www.coliban.com.au

** Operational water includes all losses eg. evaporation, system losses, seepage and treatment process losses.

What we currently have access to

Campaspe River bulk water entitlement*	Carry over water from last season	Temporary water purchased	Total (Megalitres)
107.5ML	0ML	0ML	107.5ML

* Under current Ministerial Qualification of rights to water, Coliban Water has access to 50% of Bulk Entitlement allocation until 50% allocation to irrigators is reached for essential human need. This 50% equates to 107.5ML.

Current volume extracted for 2008/2009 season

Town	Volumes (Megalitres)	
Axedale ^	13.6	
Goornong	32.3	Total available
Total	45.9	107.5ML

^Axedale's water is being carted from the Bendigo – Coliban Northern system.

Additional water information

Bulk entitlement

Campaspe River annual bulk entitlement volume	Current allocation
215ML	0%

Refer to Goulburn-Murray Water for latest allocation announcements.

Further information

The Bendigo region didn't receive any rainfall in January which is well below the average of 33mm for the month.

Water restrictions outlook

Lake Eppalock volumes continue to remain low with poor inflow recorded to date. Goulburn-Murray Water's allocation outlook in the Campaspe system is remaining at zero. It is unlikely that any easing of restriction levels will now occur until after the winter period.

	Water Restriction Outlook	
	April	June
Wet	Stage 4	Stage 4
Average	Stage 4	Stage 4
Dry	Stage 4	Stage 4

These outlooks are based on allocation predictions from Goulburn-Murray Water.

Wet	Inflow conditions that have 1 in 10 chance of being exceeded
Average	Inflow conditions that have 5 in 10 chance of being exceeded
Dry	Inflow conditions that have 9 in 10 chance of being exceeded
